Subject: Heads up that received control from Boehner on Storis ship export to Mexico

I wanted to make you aware that John Boehner has sent EPA a control (AL-14-000-0576) asking whether the Storis ship exported to Mexico contains toxic substances (PCBs and asbestos) covered by TSCA. A constituent contacted Boehner's office which led to the control we received. The ORCR due date for the control is November 19. I will confer with others to discuss next steps.

I've attached an electronic version of the control.

Rick
